Subject: Tanks with no analytical summary
Date: Friday, February 20, 2015 9:32:44 AM

Gary and Beth:

We have been pulling together information on tanks that have not been analyzed. I have highlighted these on the action white board for discussion. I just want to summarize these vessels.

We have the three neutrals.

4-048M (PT 3) 5,000 gallons Heavy viscous liquids when pulled out of the valve, lubricant? The top is thinner and was field categorized as a **02 Neutral Liquid**. (Sample, analyze, profile)

PT 4 7,000 gallons This has not been field categorized. It is a neutral pH, low VOC, with the liquids maybe five feet of a gray solid. (Sample, analyze, profile?)

R01 1,000 gallons This has not been field categorized pH 7 clear. (Field Categorized, Test Compatibilities, move to Frac Tank?)

One Black Sludge

T 108 High VOC, High H₂S. (Move to sludge box 25322?)

We have four acid tanks

R02 1,000 gallons This has not been field categorized or tested for compatibility. Low pH Strong Acid. (Field Categorized, Test Compatibilities, assign group, profile)

PT 6 150 gallons This has not been field categorized or tested for compatibility. Low pH Strong Acid. (Field Categorized, Test Compatibilities, assign group, profile)

4-046 M (PT1) Field Categorized, tested for compatibility. Low pH Strong Acid **07 Acid Liquid** (Sample Group or Tank)

4-047 M (PT2) Field Categorized, tested for compatibility. Low pH Strong Acid **06 Acid Liquid** (Sample Group or Tank)
